

Steel Dynamics, Inc.[®]
Long Products Group

WE'RE IN IT TOGETHER

We are a proud member of the steel community and that includes prioritizing the safety & wellness of our employees, customers, and families not only through the good times, but also through times of adversity. With the continued threat of the coronavirus (Covid-19), our team has taken many precautions in an attempt to maintain a healthy environment and mitigate potential exposures:

1. Specific education of employees regarding proper hygiene, social distancing, handwashing, staying home when sick, etc.
2. Implementation of staggered shift times to minimize person to person contact.
3. Identification of critical positions and contingency plans to sustain operations.
4. Implementation of work from home options where available.
5. Increased cleaning and sanitizing frequencies throughout the facility.
6. Shuttering cafeteria options to minimize social gathering.
7. Implementation of travel restrictions for all employees.
8. Implementation of visitor restrictions including travel vetting and screening prior to facility entry.
9. General minimization of social gatherings and discussions.
10. Vetting of raw material supply chain risks with contingency plans where necessary.

Currently, we are on schedule with customer deliveries and do not anticipate delays. We will continue monitoring and providing immediate feedback to customers if we determine there will be an impact based on the rapidly changing pandemic environment. Steel Dynamics' operating culture allows great flexibility through tough markets, issues, and even pandemics. Our employees step up each and every time to ensure we meet our customer's needs to the best of our ability.

Thank you for your partnership and continued trust in Steel Dynamics. We truly value each and every customer and the relationships we have built through our mutual business interests. We are all in this together and will prevail stronger on the other side of this unprecedented situation.
